VIRTUAL INTERNSHIP REPORT

DATA ANALYTICS

A Virtual Internship Completion Report

INTERNSHIP PERIOD

15 September 2026 – 22 September 2026

STUDENT CREDENTIALS

Madhur Kumar

Domain
Data Analytics

University
IILM University, Greater Noida

Program
B.Tech (Computer Science & Engineering)

HOST ORGANIZATION

EdVyro IT Solutions

Candidate & Program Overview

Candidate Details

Student Name: **Madhur Kumar**

Roll Number: 25SCS1003003148

Degree: B.Tech (Computer Science & Engineering)

Academic Batch: 2026-2027

University: IILM University, Greater Noida, U.P.

Internship Profile

Program Name: Virtual Internship Programme

Specialization Domain: Data Analytics

Duration: 8 Days (15 September 2026 – 22 September 2026)

Organization: EdVyro IT Solutions

Credential ID: EDV-SEP26TOSEP26-349

Organization Profile: EdVyro IT Solutions

EdVyro IT Solutions is the organization named on my internship completion certificate.

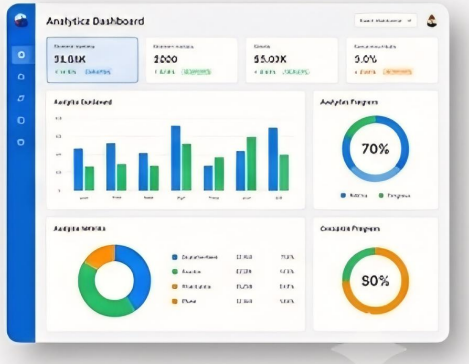

Internship Domain: Data Analytics

Key Learning Areas

- Data Quality and Exploratory Analysis
- Business KPI Dashboard
- Practical Data Analytics Tasks
- Data Interpretation and Reporting

Internship Objective

To gain practical exposure to data analytics through structured tasks involving data analysis and business performance reporting.

Data Analytics & Dashboard

Problem Statement & Industry Context

The Industry Challenge

- Raw data may contain missing, duplicate, or inconsistent values.
- Unorganized data makes analysis difficult.
- Businesses need clear information to understand their performance.
- Important business trends may remain hidden without proper analysis.

The Solution Scope

- Check and improve data quality.
- Perform exploratory data analysis.
- Identify patterns and trends in data.
- Present important business KPIs through dashboards.
- Support better decision-making using data.

Core Internship Objectives

Data Quality

Understand and check the quality, consistency, and completeness of data.

Exploratory Data Analysis

Explore datasets to identify patterns, trends, and unusual values.

Business KPI Dashboard

Understand how key performance indicators can be presented visually.

Data Interpretation

Convert analyzed data into meaningful information for decision-making.

Technologies & Tools Used

Data Analysis

- Dataset inspection
- Data cleaning and validation
- Exploratory data analysis

Data Visualization

- Charts and graphs
- KPI visualization
- Dashboard presentation

Programming & Data Tools

- Python / Pandas (libraries)
- Excel (data handling)
- Power BI / Tableau (dashboards)

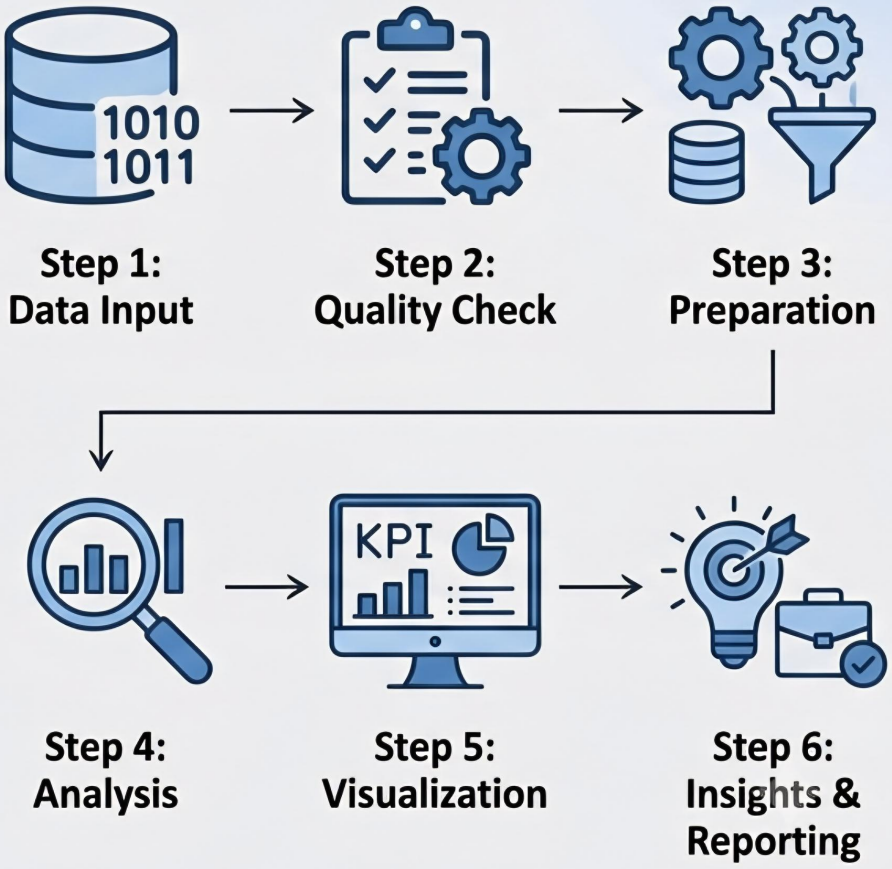

Project Documentation

- GitHub for project code and deliverables

Data Analytics Workflow

- **Step 1: Data Input:** Start with the available dataset.
- **Step 2: Data Quality Check:** Inspect the data for missing values, duplicates, and inconsistencies.
- **Step 3: Data Preparation:** Prepare the data for further analysis.
- **Step 4: Exploratory Analysis:** Examine patterns, trends, and relationships.
- **Step 5: KPI Visualization:** Present relevant metrics through charts and dashboards.
- **Step 6: Insights & Reporting:** Summarize findings and communicate the results.

Task 1: Data Quality and Exploratory Analysis

Objective

To examine the quality of a dataset and explore its important characteristics.

Key Activities

- Inspect the dataset structure.
- Check missing and duplicate values.
- Identify inconsistencies in the data.
- Explore distributions and patterns.
- Summarize the findings.

Evaluation Score

85/100

Grade: B

Project Repository

https://github.com/madhur25scs1003003148-ship-it/Madhur

Task 2: Business KPI Dashboard

Objective

To understand how business performance can be presented using key performance indicators.

Key Activities

- Identify relevant business performance metrics.
- Organize the data for reporting.
- Present KPIs using suitable visualizations.
- Develop a dashboard for performance monitoring.
- Interpret the displayed information.

Evaluation Score

85/100

Grade: B

Project Repository

https://github.com/madhur25scs1003003148-ship-it/Madhur

Key Projects & Demonstrated Skills

- **Data Quality Analysis:** Worked on a task focused on data quality and exploratory analysis.
- **Exploratory Data Analysis:** Explored data to understand its characteristics and identify meaningful patterns, where applicable.
- **Business KPI Dashboard:** Worked on a dashboard task related to business performance indicators.
- **Business KPI Dashboard:** Worked on a dashboard task related to business performance indicators.
- **Data Visualization:** Learned how visual representations can make information easier to understand.
- **Technical Documentation:** Maintained project deliverables in the referenced GitHub repository.

Internship Evaluation & Performance

	Task	Grade	Score
1	Data Quality and Exploratory Analysis	B	85/100
2	Business KPI Dashboard	B	85/100
3	LinkedIn Task	A	95/100

Performance Summary

- The internship evaluation report records successful completion of the listed tasks in the Data Analytics domain.
- The evaluation reflects performance across data analysis, dashboard-related work, and the LinkedIn task.

PERFORMANCE EVALUATION

The candidate has successfully demonstrated proficiency in Data Analytics by completing a series of rigorous, industry-aligned tasks. Their submitted work reflects a solid understanding of core concepts and a strong capability to apply technical skills in practical scenarios. We commend their dedication and wish them continued success in their professional journey.

THANK YOU!

Madhur Kumar
